Objective

Detail-oriented and passionate Full Stack Developer with a strong foundation in Python, Django, and front-end technologies. Experienced in developing scalable web applications, e-commerce platforms, and service-based websites. Adept at problem-solving, teamwork, and delivering high-quality solutions.

Experience

- **Synnefo Solutions** — 8 August 2024 - 10 March 2025
  Python Fullstack Trainee
  Gained hands-on experience in developing full-stack web applications using Django and Flask. Designed and implemented responsive user interfaces with HTML, CSS, Bootstrap, and JavaScript, ensuring seamless front-end functionality. Worked extensively with REST APIs and integrated MySQL/SQLite for efficient data management.

Education

- **College of Engineering Perumon** — 2024
  Bachelor of Technology in Electronics and Communication Engineering
  7.72

- **College Of Engineering Perumon** — 2024
  Minor Degree in Computer Science Engineering

Skills

- Programming Languages: Python, JavaScript
- Frontend: React, HTML, CSS, Bootstrap
- Backend: Django, Flask
- Databases: MySQL, SQLite
- Version Control: Git, GitHub
- Tools & IDEs: VS Code

Projects

- **QuickPick – Local Service Finder Website**
  Built a service marketplace using Django, Python, HTML, CSS, Bootstrap, and JavaScript. Enabled user booking, service provider management, and real-time notifications. Developed an admin panel for seamless backend management.
- **CosmoChic – Cosmetics E-Commerce Platform**
  Designed and developed a responsive e-commerce platform with Django backend. Integrated payment gateways, shopping carts, and email notifications. Ensured smooth product listing, order processing, and user authentication.
- **Portfolio Website**
  Created a personal portfolio using Flask to showcase skills, projects, and achievements. Integrated a contact form with secure email functionality.
- **Power Theft Detection and Monitoring System**
  Developed a system to identify unauthorized electricity usage using IoT and data analytics.Enhanced power distribution reliability through automated monitoring.

Conference And Publications

- Presented paper titled 'Integrated Smart Energy Metering System: Enhancing Power Theft Detection through IoT Technology' at International Conference on Emerging Trends in Electronics and Communication Engineering.
